DATA DICTIONARY
ETHIOPIA SCHOOL SURVEY AND
RETEST DATA

Young Lives
An International Study of Childhood Poverty

The Ethiopia School Survey Wave 1 involved Young Lives Younger Cohort children studying in Grade 5 in November-December 2012, together with a sample of their peers. The initial sample of Young Lives children comprised all Younger Cohort children expected to be studying in Grade 4 and 5, in schools which fell within the geographic boundaries of the Young Lives sentinel site. These children were tracked to their schools, where all Grade 4 and 5 classes containing a Younger Cohort child or children, were sampled. In each class, a random selection of peers were added to the sample of Young Lives children, so that 20 children per class were included in the survey.

Wave 2 of the survey involved the same Young Lives children and their peers as were included in Wave 1. If children who had been surveyed at Wave 1 were not present at Wave 2, they were simply not included, and no substitute children were added.

A total of 14 data files are generated from the Ethiopia School Survey and Retest dataset. The following table lists the data files which are detailed in the rest of this document.

Data File Name	Description
Wave 1 data files	
ET_ClassLevel_R2	Contains the school and class ID – and basic information about the class such as number of students enrolled and the description of the class.
ET_PrincipalLevelData_R2	Administered individually by fieldworkers to principals. Sometimes principals were in charge of main sites and their satellites. Collected background data on the Principal, as well as school-level information.
ET_PupilLevelData_R2	Administered to the whole class. Fieldworker led and directed. Collected background data on the Pupil, as well as information on attitudes to school curriculum-related assessments.
ET_SchoolLevelData_R2	Fieldworker completed through observation of school site during their time in the school. One per site i.e. one for main school and another for satellite school. Collected data on school infrastructure.

ET_SiteLevelRoster_R2	List the children by site and whether they attend a school and their class.
ET_TeacherLevelData_R2_ForExternalRelease	Teacher level data
Wave 2 (retest) data files	
ETChangeTeacher	
ETClassRoster	Wave 2 Class roster – including changes from Wave 1
ETPupilLiteracyTest	Pupil Literacy Test
ETPupilMathsTest	Pupil Maths test
ETPupilRoster	Roster of the pupils by school/class
ETSchoolIdentification	Date of visit to school
ETSchoolTeacher	
ETTeacherRoster	Teacher Roster for Wave 2

The following codes are standard across most of the numeric variables in the dataset:

> 77 = Not known (NK) – This is where the respondent says they do not know;
> 88 = Not applicable (N/A) – This is where the question is not applicable because of a response given to an earlier question;
> 99 = Missing – The question was missed during fieldwork or was not clearly recorded;
> 79 = Refused to answer – The respondent did not want to answer the question.

For variables where these values are feasible for the question the missing value codes are negative. Also for year-codes, the missing value codes are composed of 4 digits instead of 2; i.e. 7777= NK, 8888=N/A, 9999= Missing. For year-code variables, the code 79= Refused to answer has not been generated.
